SUMMARY

Dedicated and enthusiastic B.Tech Computer Science student with a strong interest in AI/ML and Data Science. Eager to apply technical skills and theoretical knowledge in a dynamic real-world environment through impactful projects and collaboration.

EDUCATION

Christ University, Bengaluru

Bachelor of Technology in Computer Science

Expected 2027

Current GPA: 3.84 / 4.0

EXPERIENCE

Coding Jr

AI Research Intern

- Developed an AI-powered coding assistant as a VS Code extension using LLMs.
- Worked on frontend and backend features for AI-assisted coding and user interaction.
- Supported deployment and integration of AI features.

Zenlegal Technology Private Limited, Bengaluru

AI Tech Intern

- Worked with legal documents and datasets to support AI model training and evaluation.
- Researched Indian legal frameworks and evaluated AI-generated legal responses.
- Performed testing and quality checks on AI workflows and datasets.

Forematic Techenow Solution Pvt. Ltd., Bengaluru

Associate Engineer

- Developed features for a Gate Management System using React.js, Node.js, Express.js, and MongoDB.
- Built responsive dashboards and implemented REST APIs and CRUD functionality.
- Worked on authentication, input validation, search, and frontend-backend integration.

TECHNICAL SKILLS

Languages:

Python, Java, SQL

Frameworks & Libraries:

React.js, Node.js, FastAPI, REST APIs,

Databases & Tools:

MySQL, Tableau, git, GitHub

Core CS

Data Structures & Algorithms (DSA), DBMS

Data Analysis, Machine Learning, GenAI

PROJECTS

ClauseAI – AI-Powered Contract Analysis Platform

- Architecting an LLM platform featuring a RAG pipeline for smart contract summarization and contextual Q&A.
- Implementing vector database embedding generation, PDF text extraction, and semantic search routing.

Audio & Video Deepfake Detection (Research Paper)

- Audio Deepfake Detection: SHAP-explainable Random Forest + Quantum ML on acoustic features
- Video Deepfake Detection: SHAP-explainable Random Forest + Quantum ML on facial/temporal artifacts.

IoT-Based Fire Alerting System

- Redesigned an extensive IoT architecture paper into a simplified lab-scale Arduino circuit layout.
- Programmed embedded threshold-based C++ logic to trigger immediate LED and buzzer alerts in Tinkercad.

Credit Card Fraud Detection — Classification & Business-Cost Analysis

- Built and compared Logistic Regression and Random Forest models on 284K+ transactions with severe class imbalance (0.17% fraud), using stratified sampling and cost-sensitive class weighting.
- Quantified model trade-offs via a business-cost framework, showing the higher-precision model was not the cost-optimal choice for deployment.
- Deployed an end-to-end `sklearn.Pipeline` with a saved model artifact and visualized results through an interactive Tableau dashboard.

CERTIFICATIONS

- **AWS Academy Graduate** – Data Engineering
- **AI Fundamentals** – IBM SkillsBuild
- **Process Management Foundations** – Celonis

ACHIEVEMENTS

- **MSME 5.0 National Hackathon:** Selected to participate and collaborate on innovative technology solutions.
- **NPTEL Certification:** Successfully completed professional training in Leadership and Team Effectiveness.
